NEW PRODUCTS

TOUCHLESS CONTAINER CAR WASH

The new solution from the Silver Design series is a lightweight structure with transparent banners separating the washing stations. A simplified roof with band backlighting adds an architectural dimension to the structure. The container car wash is a complete unit designed for installation in a technical room. The washing technology is based on a stainless-steel frame with the control system.

TOUCHLESS MODULAR CAR WASH

The modular car wash is a free-standing unit with stainless steel housing. Inside the housing, all the components of the car wash and controls are located. The new design is complemented by a tilt control panel, and thanks to the rounded shapes and minimalist colour scheme, the new Silver Design module is a great solution for modern investment sites.

COMPACT SINGLE-STATION CAR WASH

Our new product is the small and easy-to-use compact car wash from the Silver Design series. Ideal solution for vehicle inspection stations, car repair shops or showrooms.

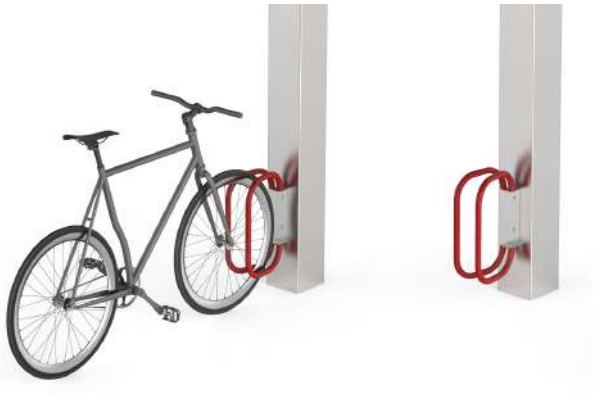

New!

OWN PRODUCTION

BENCH

The modular bench made of stainless steel ideally retrofits a car wash with comfortable and elegant seating space. The possibility of arranging the benches in any configuration adds variety to the space around the car wash. The colour and finish of the product remains consistent with the overall facility.

BICYCLE HOLDER

A new high-quality product that allows bikes to be positioned on the wash stand. In this way, the car wash can also be used by cyclists.

WASTE BIN AND RUG BEATER

The new waste bins are durable and easy to use for both customers and car wash owners. The hinged bin conceals the waste inside, and the inside of the bin can be emptied with ease. The rug beater of the Silver Design series is of a similar size to the bin, so that the products can be combined together.

Within your reach!

PAPER DISPENSER

The machine supports comprehensive use of a touchless car wash. It is equipped with high-quality paper to polish the plastic parts of the car, preventing pollen and dust from accumulating again. In addition, the material used is highly absorbent and can be used to wipe car windows and bodywork.

Comprehensive

CENTRAL VACUUM CLEANER

Self-service vacuum cleaners are an excellent addition to any car wash equipment. The new solution allows multiple workstations to be serviced by a single unit. The simple design ensures that the customer knows how to use the device intuitively.

STEAM CLEANER

Self-service steam cleaner for upholstery washing. Designed to clean, refresh and disinfect car interiors. Helps eliminate unpleasant odours inside the vehicle. Steam cleaning thoroughly disinfects the car with a very short drying time.

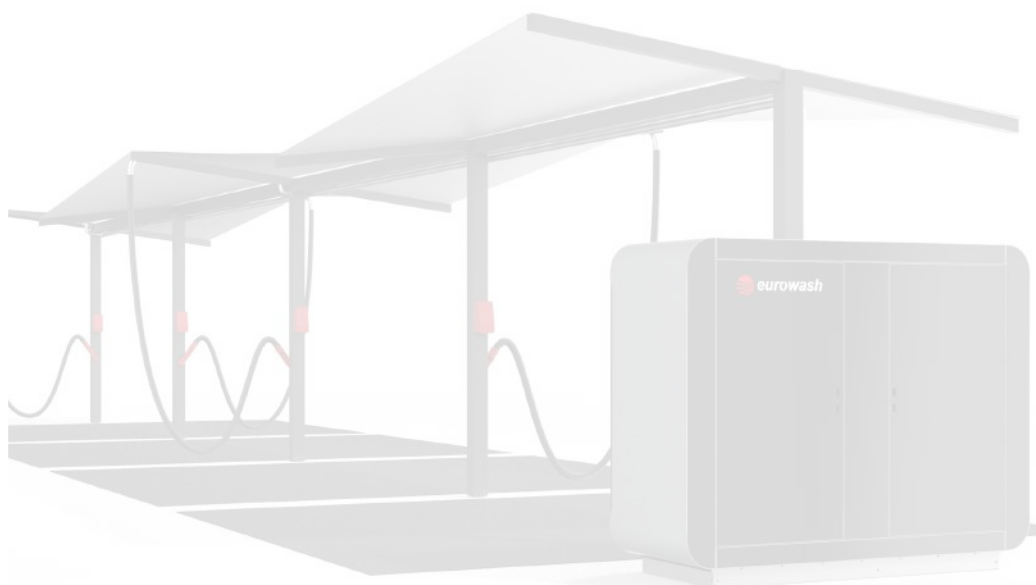

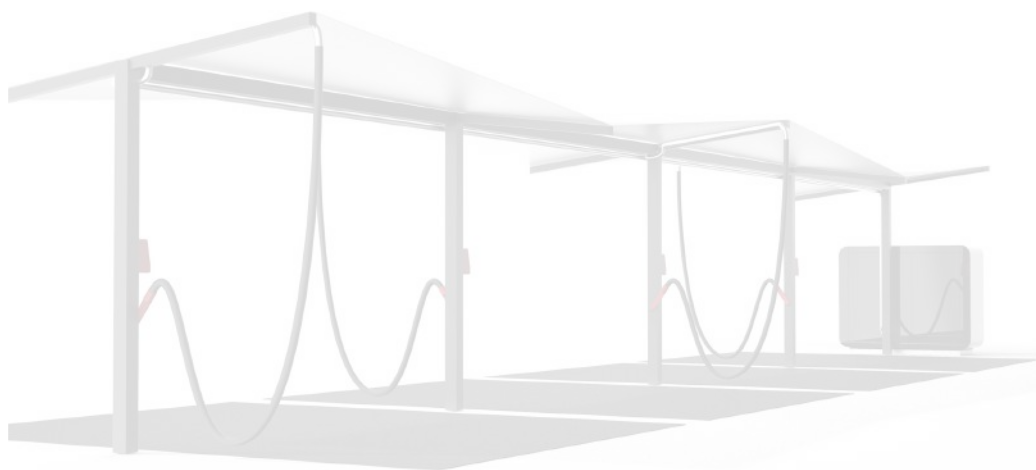

SINGLE-PHASE AND THREE-PHASE VACUUM CLEANER

Self-service vacuum cleaners are an excellent addition to any car wash equipment. All vacuums feature a four-metre-long cable, a nozzle and are characterised by high suction power. The simple design ensures that the customer knows how to use the device intuitively.

PROFESSIONAL CAR DETAILING STAND

A stand created with professional detailing shops in mind. It is an osmotic water dispenser. It ensures that the water is demineralised and purified of minerals. When applied, it leaves no streaks or stains on the car body.
